Yes. Martha McElfresh is the lady I have been communicating with for the spill.

Is this the person you were talking to?

We had some recent information that PPH was also in the storage tank and Walt was asked to go back and look at data to determine if they could see these compounds (propylene glycol phenyl ethers). We are getting a sample of the source material Friday and can test to see if would see it using GC/MS. I'll send you emails if you are still interested in staying in the loop on this.

Cindy – You may already have this info.

Walt Ivey would recommend Martha McElfresh as a POC - She has been running a lot of samples. Martha.A.McElfresh@wv.gov<mailto:Martha.A.McElfresh@wv.gov> Her phone number is 304-965-2694 or 304-610-1284.
